

Portfolio project- Jamal Rizki

Overview

The goal of the project is to redo my artist page (previously made in wix), in a bootstrap format. I was a professional musician prior to the pandemic, so somehow merging web development and music would be ideal for me.

Features

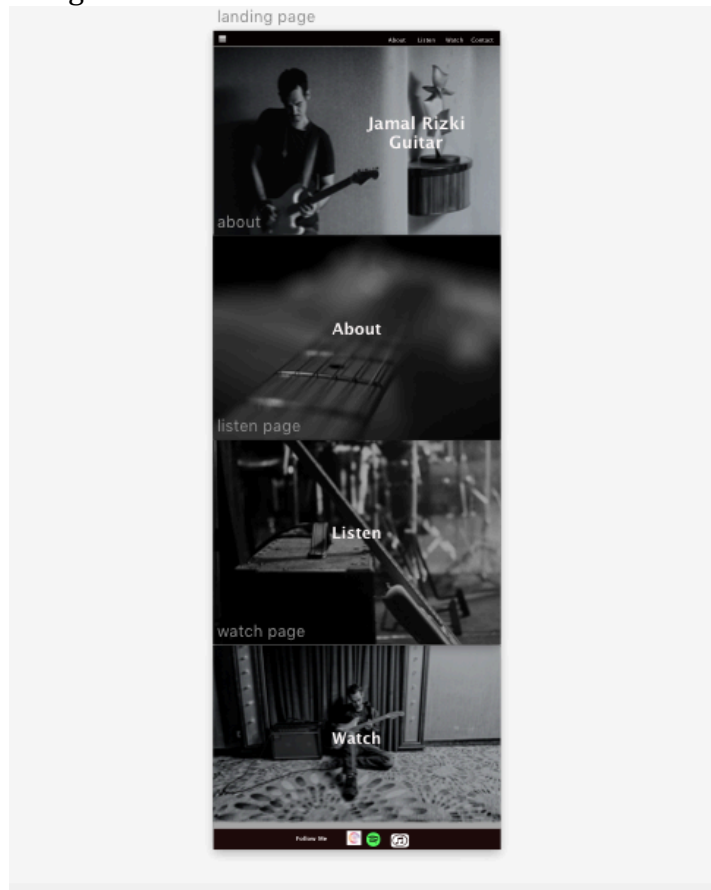

The utilization of a third party music player, ie apple music, spotify etc.

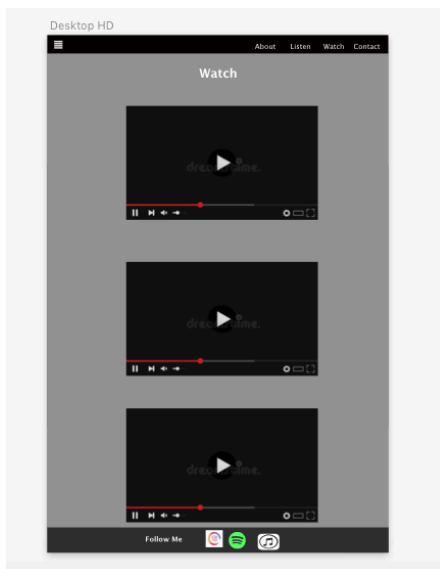

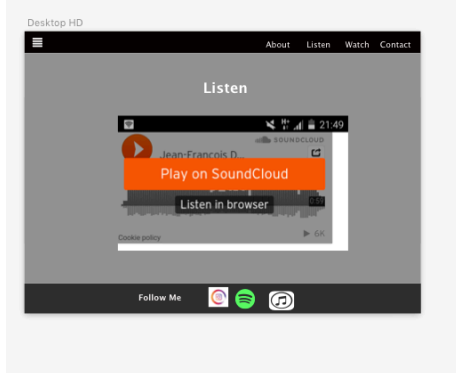

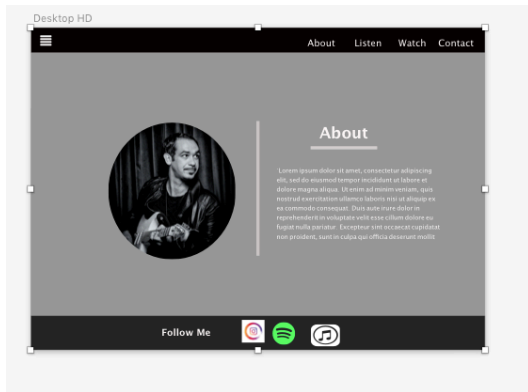

The utilization of a third party video player, ie youtube, vimeo etc

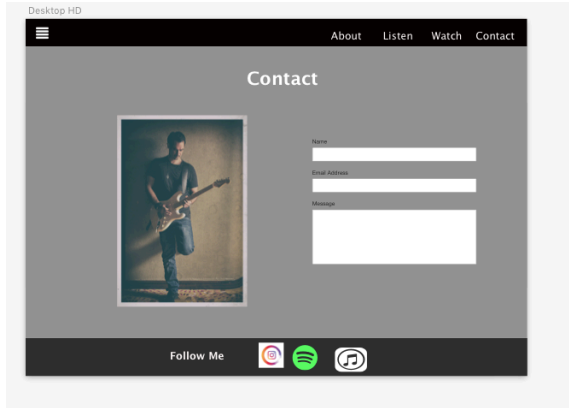

Contact form

Animated headings

Design

I want the website to be really simple and clean.
The main feature will be animated headings.

Navigation

The navigation will be really simple.

On small devices the nav bar will collapse and take up the screen width.

On md and up navigation will be done via the nav bar or alternatively via the landing page.
